

Be safe! NEVER HANDLE A BAT

You **Can't Tell** by Looking at a Bat if it has Rabies!

- Transmission of rabies virus can occur from minor, seemingly unimportant, or unrecognized bites from bats.
- If you find a bat, **don't touch** it even if it is injured. Contact local authorities for assistance.

Seek **Medical Attention** Immediately

- If you've been bitten or scratched by a bat; wash the affected area thoroughly with soap and water.
- If you woke up with a bat in the room where you were sleeping; you may have been bitten and not know it.

For more information, contact your installation's Department of Public Health.
