

Acute Respiratory Disease Weekly Surveillance Summary Among Army Trainees

Week Ending 22 March 2025

Fort Benning
(formerly Fort Moore)

DEFINITIONS:

Acute Respiratory Disease (ARD) Rate=(ARD cases/Trainees) *100

Strep Rate=(Strep Cultures (+)/Cultures) *100

Strep-ARD Surveillance Index (SASI)=(ARD Rate*Strep Rate)

Strep Testing Compliance (STC) =% of ARD cases tested for Strep at each installation (those installations highlighted in red are at less than 60% compliance)

NOTE: The ARD and strep rates are for febrile cases only. An ARD case is defined as a trainee with an oral temperature of at least 100.5°F, at least one symptom of acute respiratory inflammation, and a limited duty profile signed by the examining medical provider, which limits or restricts duty for at least 8 hours.

	ARD Rate	SASI	STC
Fort Benning	0.05 (↑)	0.00 (↔)	100%
Fort Jackson	NA	NA	NA
Fort Leonard Wood	0.05 (↓)	1.68 (↑)	100%
Fort Sill	0.00 (↓)	0.00 (↔)	—

Weekly Rate/SASI (Change from Previous Week)

↑=Increase ↓=Decrease ↔=No Change
NA=Not Available — Testing Not Necessary

Data Source: ARD Weekly Report

Threshold: ARD Rate exceeding 1.5% or SASI exceeding 25*

*Exceedance of either threshold for 2 consecutive weeks is defined as a potential outbreak and prompts investigation at the installation level.

Note: Missing data between 21 December 2024 and 04 January 2025 were due to block leave. Also, some installations are missing data between 19 November 2022 and 22 March 2025 due to issues with the transition to using MHS GENESIS data.

Males			
Unit Strength	ARD Cases	Strep Test Done	Strep Positive
6,285	3	3	0

Females			
Unit Strength	ARD Cases	Strep Test Done	Strep Positive
155	0	0	0
