FISCAL YEAR 2027 UPDATE TO PUBLIC HEALTH INFORMATION PAPER NO. 12-01-0717: A TAXONOMY OF INJURIES FOR PUBLIC HEALTH MONITORING AND REPORTING

PURPOSE. This Technical Information Paper (TIP) documents the fiscal year 2027 (FY2027) Update to the Defense Centers for Public Health–Aberdeen's (DCPH-A) Taxonomy of Injuries and non-injury categorizations for public health reporting and investigations.

FACTS.

In 2017, the U.S. Army Public Health Center (now DCPH-A) originally documented the Taxonomy of Injuries in PHIP No. 12-01-0717: *A Taxonomy of Injuries for Public Health Monitoring and Reporting* (https://apps.dtic.mil/sti/citations/AD1039481). The Taxonomy of Injuries provides categories for injury medical diagnoses based on causal energy sources (e.g., mechanical, environmental, poisonings). The injury definition consists of over 13,000 incident injury medical diagnostic codes from the *International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM).* The non-injury ICD-10-CM medical conditions are also categorized for medical care utilization reporting, such as in the *2022 Health of the Force* report: https://ph.health.mil/Periodical Library/2022-hof-report-web.pdf#page=15.

Each year, the U.S. Centers for Disease Control and Prevention (CDC) updates ICD-10-CM diagnosis codes for medical encounter documentation. DCPH-A annually reviews the CDC's fiscal year (FY) updates and documents resulting changes to the Taxonomy of Injuries, medical care utilization categories, and associated methodology. Previous annual updates are available here:

The FY2027 CDC ICD-10-CM update included a total of 224 code changes: 190 new codes, 4 revised codes, and 30 deactivated codes. There were 28 new incident injury diagnosis codes. The CDC's FY2027 updates were not substantial; all new diagnosis codes aligned with or replaced existing codes. Tables 1–3 present the FY2027 updates to the ICD-10-CM code lists and categorizations for the Taxonomy of Injuries and overall medical care utilization reporting.

Complete updated lists of ICD-10-CM code lists and categorizations for the Taxonomy of Injuries and overall medical care utilization reporting are posted to https://denix.osd.mil/auth/dsocsg/taxonomy-of-injuries/ and are available upon request from dha.apg.Pub-Health-A.mbx.injuryprevention@health.mil.

Notes:

*This document describes the FY2027 update to ICD-10-CM codes captured in the Taxonomy of Injuries, described in PHIP No. 12-01-0717: *A Taxonomy of Injuries for Public Health Monitoring and Reporting* (with Addendum 1, Body Regions and Injury Types, and Addendum 2, FY 2018 Update), original report at https://apps.dtic.mil/sti/citations/AD1039481.

The CDC's FY2027 code updates are not substantial; Taxonomy of Injuries categorizations for all new diagnosis codes align with existing categorizations for similar codes established in previous reports. A complete updated list of Taxonomy of Injuries ICD-10-CM codes is available upon request from: dha.apg.Pub-Health-A.mbx.injuryprevention@health.mil

Note: Traumatic brain injury (TBI) is defined as traumatically induced structural injury and/or physiological disruption of brain function as a result of an external force, with the presence of additional clinical signs. Not all encounters with Taxonomy-identified brain injury diagnoses meet the requirements to be considered a TBI.
